

Temporarily store your furniture in your garden?

Of course! With the Cocon storage system!

If you're planning on doing some renovations in your home (new floors, painting the walls or other renovations), you may be questioning yourself about where to put all of your furniture.

The Cocon storage system provides the answer: simply in your own garden. In a hermetically sealable bag: dry, safe and within arm's reach. Within 30 minutes, everything could be inside, and you'll be able to get to work.

Cocon specifications

- The Cocon bag is made from extremely strong black/white polyethylene and is reusable.
- The Cocon is watertight, lightproof and UV-resistant, making it especially suitable for outdoor use.
- The Cocon is suitable for all seasons and is resistant against all weather conditions, including severe frost.
- The living room is often next to the garden, meaning that your furniture will be outside in a flash. You don't need to drag your furniture around and this will reduce the risk of damaging furniture, walls and doors.
- The bag is 315 cm wide and has a diameter of 200 cm when optimally filled.
- The bag is sealed on three sides.
- The standard length (medium) of 6 metres is sufficient for storing: a dining table, 6 chairs, 4 lounge chairs, an exercise bike, a 2-seater and 3-seater sofa, a coffee table, 2 side tables and various other small items.
- The Cocon is available in small, medium or large. Different dimensions are available on request.

Interested in the Cocon?
